

Indicator, Audio Visual, Wall/Ceiling Mounted – **A137**

This audio visual indicator unit has a 50mm lens through which an incandescent bulb will indicate calls. Also it has a piezo sounder that will sound in pulses. It can be flush mounted or surface mounted on a double gang, standard 45mm deep electrical socket box. When a call is activated on the system the indicator unit will illuminate to indicate that a call is active, at the same time the sounder will sound. This sounder is available to sound at different rates, depending on your requirements. The unit can also be used as a zone lamp or part of a follow light setup. This unit is available in white plastic, powder coated steel, stainless steel and satin chrome. The sounder pulse rates available are;

1 second on 9 seconds off = Standard NHS nursecall pulse rate – 1:9
1 second on 1 second off = Standard NHS emergency pulse rate – 1:1
Half second on, Half second off – ½:½

Part numbers for these units are;
Plastic – A137/WH/A/1:9
Powder Coated – A137/PC/A/1:1
Stainless Steel – A137/SS/A/½:½
Satin Chrome – A137/SC/A/1:9

A43 is the part, WH is the finish, A is the lens colour. 1:9 is sounder rate
