

### Power Supply Unit, 30VA, Nursecall & Emergency – **A18/30/NE18**

This power supply is used with medium to large nursecall systems. It comes complete mounted in an adaptable steel box for easy installation, with any other necessary electronics for your nursecall system. The unit also has power on LEDs for easy visual checks on the PSU condition. The nursecall voltage is set to 18v and can be easily adjusted with a small flat screwdriver from between 5 and 25 volts. The emergency voltage remains pre set at 24V which flashes on and off at half second intervals. The mains input is protected by fuse and the emergency output voltage is protected by fuse. The nursecall voltage is protected by the LM338K transistors safety feature.

Part number for this unit is  
Edison 30VA Power supply unit - A18/30/NE18
