

Indicator, Visual, Wall/Ceiling Mounted – A43

This visual indicator unit has a 50mm lens through which an incandescent bulb will indicate calls. It can be flush mounted or surface mounted on a single gang, standard 45mm deep electrical socket box. When a call is activated on the system the indicator unit will illuminate to indicate that a call is active. The unit can also be used to output calls to a zone lamp or follow light setup. This unit is available in white plastic, powder coated steel, stainless steel and satin chrome.

Part numbers for these units are;

Plastic – A43/WH/A

Powder Coated – A43/PC/A

Stainless Steel – A43/SS/A

Satin Chrome – A43/SC/A

A43 is the part, WH is the finish, A is the lens colour.
