

Call Point, Emergency Pull, Wall Mounted – A6

This emergency call point has a standard NHS type emergency pull switch. It can be flush mounted or surface mounted on a single gang, standard 45mm deep electrical socket box. A call can be activated on the system by pulling on the emergency switch. The assurance indicator will illuminate to indicate that a call is active. The unit is reset by pressing the switch back in. This unit is available in white plastic, powder coated steel, stainless steel and satin chrome.

Part numbers for these units are;

Plastic – A6/WH

Powder Coated – A6/PC

Stainless Steel – A6/SS

Satin Chrome – A6/SC
